

BLACKSTONE OUTDOOR GRIDDLES

Why A Griddle?

- Blackstone are propane powered grills featuring a flat top griddle created from a solid piece of heavy, cold-roll steel that heats consistently and evenly.
- Maximum cooking flexibility, allowing you to cook everything at once, side by side, using different temperatures based on the positioning of your foods.
- Since there are no grates, greases flow from the grilled top into an oil cup for easy collection and disposal.
- Cook everything from a full breakfast to a lunch of sandwiches to a dinner of stirfry and steak.
